

## E71T-GS Gasless Flux Cored Wire (MS)

E71T-GS Gasless Flux-Cored Welding Wire is a versatile, self-shielded wire used for welding mild and carbon steels. It eliminates the need for external shielding gas, making it ideal for outdoor or windy conditions. This wire provides strong, clean welds with minimal spatter and is suitable for a variety of general-purpose welding applications.

### Product Description

E 71-T1 is a superior quality Flux Cored Wire suitable for welding in all position on wide range of welding current under CO shielding. The wire is further characterised by smooth arc, easy slag detachability and produces X- 2 ray quality weld with exceptional Impact strength at sub-zero temperature down to -20° C.
